

PBX On The Cloud

By **UnifyComm**

Your phone extension, anywhere in the world!

If you have been considering replacing your old business phone system and traditional phone carrier or if you want to install a new system using the latest Voice over IP (VoIP) technology, **PBX On The Cloud** is your ideal solution.

A fully-fledged phone system is usually complex and require high capital expenditures, IT staff expertise and maintenance costs.

PBX On The Cloud is offered as a service, so you will lower your costs on equipment and phone

usage, especially on long distance costs.

You can use powerful and low cost VoIP phones or softphones for PCs, Macs, Android or iPhone as your extensions, as long as they have access to the Internet.

Imagine your office extension in your Smartphone using your data plan and no mobile minutes, or moving your office extension home, or making long distance calls from your mobile using the low rates from your office VoIP lines.

Features

What is it?

- A Full Business Class Phone System offered as a service
- Replaces old legacy PBXs with state-of-the-art Voice Over IP (VoIP) Technology
- Eliminates the need for complex in-house phone systems and maintenance

Benefits

- No need to purchase a new phone system
- Simple no-contract, monthly fees per line/extension
- All the features of a traditional phone system plus all the mobility the Internet gives you
- You can keep your actual phone numbers or buy new ones even in different countries
- Low cost international calls
- Eliminate cabling and technician costs
- Complete mobility: Your extensions can be plugged anywhere you have Internet access. Your Smartphones can become extensions using your data plan.

How it works

- If you buy VoIP phones from us, we will preconfigure them or provide instructions for yours.
- Tell us how you want your system to be configured, connect your phones and you are ready to go
